

1.5 Ton Ride-On EV Roller

Electric Transmission · Model HKEV-1500 · Zero Emissions

The 1.5-tonne rolling performance of the hydrostatic model, now battery-powered. A brushless DC motor and maintenance-free 60V battery deliver a clean, quiet roll with no fuel and no fumes — ideal for enclosed grounds, early-morning preparation and clubs focused on cutting emissions. Forward and reverse on a single lever.

SPECIFICATIONS

Model	HKEV-1500, Self-start
Operating weight	1500 kg
Electric motor	BL DC (brushless)
Battery type	60V 100Ah, maintenance free
Charging time	Up to 7 to 8 hrs
Operating time	5 to 6 hrs
Control panel display	Battery power, charge, on/off light
Brake	Mechanical
Speed	0–4 km/hr
Wheel diameter	600 mm
Rolling width	1000 mm
Starting	Electrical switch
Head light	Yes
Canopy	Fitted
Steering	Worm & worm wheel
Ballast option	250–300 kgs available
